What to Use — & Why

Manufactured by
The American Asbestos Products Co.,
Cleveland, Ohio.

TENKOTE LIQUID ASBESTOS ROOFING

A heavy bodied coating—made from the best roof protectors known, asbestos fibre—a mineral rock that cannot burn, rot or evaporate—waterproofing gums and asphalt, treated by our special process to be weatherproof, fire resisting and elastic, non-volatile slow drying oils to insure suspension of other ingredients and adhesiveness of product to surface of roofs, combination preservative oils, for preserving all roof materials. Protects, reclaims, preserves roofs, new or old, from action of elements, waterproofs and makes fire retarding roofs of all types. Guaranteed to give satisfactory results.

ALUMINUM TENKOTE ROOFING

Aluminum Tenkote is a heavy semi liquid roofing that forms a one piece, water proof and weather proof shield, right over the old roof. One of the most popular roofings in the market, Aluminum Tenkote not only waterproofs but also acts as an insulation against penetration of heat and cold. It's silvery surface acts as a reflector—turning back the rays of the sun and making interiors from 10 to 25% cooler in the summer. Recommended for all types of roof surfaces, except wood shingles. Coverage is from 100 to 125 square feet per gallon on metal roofs.

AMASPRO BOILER AND STACK PAINT

A special formula heat resisting black paint for use on heated surfaces, boilers, stacks, engines, etc. Will stand up under 800 degrees heat test. Also withstands extreme cold on condensers, ammonia pipe vats and tanks—covers 300 to 350 square feet to the gallon, two coats.

METALBRITE

This fine durable product in one coat covers metal like a blanket, seeping into the surface pores to make a beautiful job. You never need a second coat, regardless of the type of surface you cover. It covers 600 square feet per gallon. METALBRITE is in demand for every inside metal surface. Durable, beautiful, economical—it's made for machinery, transformers, bottling and canning equipment, tanks, vats, fences, etc.

AMASPRO COLD WATER PAINT

A cold water paint manufactured in two grades—Exterior and Interior. A pure white—sanitary, fire, retarding and durable, for walls of schools, homes, factories, large warehouses, garages, chicken houses and other buildings.

Five pounds of powder and three pints of water make a gallon of paint ready to apply. Exceptionally economical.

AMAVAR VARNISH

A tough synthetic base varnish, universally adopted by industry for "top surface" protection. Transparent, smooth and unusually durable—it has a resistance to abrasives, acids that enable it to outwear all ordinary varnish coatings.

AMASPRO HOUSE PAINT

A first quality white lead, titanox, zinc oxide and linseed oil paint for all exterior purposes. Ready to apply. The finest paint that many years' experience and best materials can produce—easy flowing, fine spreading, covers 250 to 300 square feet per gallon, two coats—dries with a high gloss finish; made in white, black and 28 other shades.

AMASPRO BARN PAINT

A very excellent metallic oxide, linseed oil paint for barns, pens, fences, factories and outbuildings. A durable wearing outside paint not affected by fumes or gases, spreads 250 square feet per gallon, two coats.

AMASPRO CEMENT FLOOR ENAMEL

A durable, tough floor builder—prevents accumulation of granolithic dust, crumbling—is alkali spot proof. Is penetrative, adhesive and cannot be washed out. Furnished in the shades designated on color chart, all at same price. It is fine flowing and quick drying.

AMASPROLITE GLOSS ENAMEL

A special gloss paint made to dry with a tile-like finish. Used as a finish on inside walls of plaster, concrete, wood, stone and metal.

A covering of great durability and beauty, heavy bodied, easily washed and adheres to a damp surface. Covers 250 square feet to the gallon, two coats; made in black and white and standard colors.

AMASPRO BRICK AND CEMENT PAINT

An exterior preservative and decorative coating for brick, cement, concrete, plaster and stucco.

Porous surfaces like those named above require a special paint because of the alkalies used in their construction. This product is alkali, acid and damp proof —keeps these surfaces from water, fills the pores and prevents the mottled appearance of plaster and concrete after exposure to heavy rains. Two coats are recommended; covers about 250 square feet to the gallon—made in attractive colors—buff, stone, brick red, moss green and drab.

AMASPRO GLAZING AND CAULKING COMPOUND

A paste for setting glass, sealing around windows, caulking boats and other uses—elastic, durable and easily applied. Outwears putty, saves time and labor —used by greenhouses, builders and makers and owners of rowboats and other small craft. Covers 300 lineal feet to the gallon.

TRAFFIC PAINT

Quality manufactured and tested street marking paint used by our largest municipalities. Heavy bodied, tough film, with "building in" merits. All standardized shades, equally resistant to heavy traffic. Covers 300 lineal feet per gallon applied by brush or machine.

AMASPRO INDUSTRIAL ENAMEL

This is a high grade enamel for exterior purposes such as carriers of all kinds. Ice cream cans, tubs, bread boxes, milk cans, pails, churns, bottle carriers, fire hydrants, mail boxes, guard rails, etc.

It is made to resist heat and cold, steam, alkalies and brine—prevents decay and rust and by adopting one color as a standard has considerable advertising value to the concern using one color throughout their establishment.

AMEPRO — INTERIOR

[illegible] oil and ceiling preservative where acids [illegible] irritating fumes are prevalent. Its non-oil formula with a batavia damar gum is unaffected by acetic, hydrochloric, 30% sulphuric, nitric, ammonia or caustic fumes. The soft eggshell finish is washable, and will not yellow with age.

SPECIAL NOTE

We maintain a very efficient Service Department which is at your disposal at all times. Prices and full information on any of our products will be gladly furnished without cost or obligation on your part. The benefit of our years of experience in the paint industry is yours for the asking, whether you buy anything or not. Let us help solve your difficult painting problems.
